I got into Web Development because I've always had an interest in computers, software and the web. After attending the Le Wagon full-stack bootcamp in Spring 2020, I continued sharpening my skills, working on a variety of websites and apps. I consider myself very competent in both front-end design as well as developing background processes and databases.

## AREAS OF EXPERTISE

ruby

rails

html5

css3

javascript

postgresql

git

rubymine

gimp

## PROFESSIONAL EXPERIENCE
